

FULL of Life

Todd Williamson

Todd Williamson was never a starving artist. His work in various fields, particularly teaching handicapped children better communication skills through art, made him a more disciplined and appreciative painter for the time in 1998 when he was finally able to dedicate all of his time to painting. Today, he approaches his work with a spiritual awareness, joy and a ceaseless passion for more. Hoojung Lee of the Klapper Gallery in West Hollywood says Williamson's amazing evolution as an artist over the years makes her honored to present his new series of abstract oil on canvas color field paintings through March. >
